(9) *Magazine article*

Roueché B. Annals of medicine: the Santa Claus culture. *The New Yorker* 1971 Sep 4:66-81.

TABLES

Type each table on a separate sheet; remember to double space. Do not submit tables as photographs. Number tables consecutively and supply a brief title for each. Give each column a short or abbreviated heading. Place explanatory matter in footnotes, not in the heading. Explain in footnotes all non-standard abbreviations that are used in each table. For footnotes, use the following symbols in this sequence: †, ‡, §, ||, ¶, **, ††. . . . Identify statistical measures of variations such as SD and SEM.

Omit internal horizontal and vertical rules.

Cite each table in the text in consecutive order.

If you use data from another published or unpublished source, obtain permission and acknowledge fully.

Having too many tables in relation to the length of the text may produce difficulties in the layout of pages. Examine issues of the journal to which you plan to submit your manuscript to estimate how many tables to use per 1000 words of text.

The editor on accepting a manuscript may recommend that additional tables containing important backup data too extensive to be published may be deposited with the National Auxiliary Publications Service or made available by the author(s). In that event, an appropriate statement will be added to the text. Submit such tables for consideration with the manuscript.

ILLUSTRATIONS

Submit the required number of complete sets of figures. Figures should be professionally drawn and photographed; freehand or typewritten lettering is unacceptable. Instead of original drawings, roentgenograms, and other material, send sharp, glossy black-and-white photographic prints, usually 12.7 × 17.3 cm (5 × 7 in) but no larger than 20.3 × 25.4 cm (8 × 10 in). Letters, numbers, and symbols should be clear and even throughout, and of sufficient size that when reduced for publication each item will still be legible. Titles and detailed explanations belong in the legends for illustrations, not on the illustrations themselves.

Each figure should have a label pasted on its back indicating the number of the figure, the names of the authors, and the top of the figure. Do not write on the back of the figures or mount them on cardboard, or scratch or mar them using paper clips. Do not bend figures.

Photomicrographs must have internal scale markers. Symbols, arrows, or letters used in the photomicrographs should contrast with the background.

If photographs of persons are used, either the subjects must not be identifiable or their pictures must be accompanied by written permission to use the photograph.

Cite each figure in the text in consecutive order. If a figure has been published, acknowledge the original source and submit written permission from the copyright holder to reproduce the material. Permission is required, regardless of authorship or publisher, except for documents in the public domain.

For illustrations in colour, supply colour negatives or positive transparencies and, when necessary, accompanying drawings marked to indicate the region to be reproduced; in addition, send two positive colour prints to assist editors in making recommendations. Some journals publish illustrations in colour only if the author pays for the extra cost.

LEGENDS FOR ILLUSTRATIONS

Type legends for illustrations double spaced, starting on a separate page with arabic numerals corresponding to the illustrations. When symbols, arrows, numbers, or letters are used to identify parts of the illustrations, identify and explain each one clearly in the legend. Explain internal scale and identify method of staining in photomicrographs.

Abbreviations

Use only standard abbreviations (see Appendix 2 for lists of common approved abbreviations). Consult the following sources for additional standard abbreviations: (1) CBE Style Manual Committee. *Council of Biology Editors Style Manual: a Guide for Authors, Editors, and Publishers in the Biological Sciences*. 4th ed. Arlington: Council of Biology Editors, 1978; and (2) O'Connor M, Woodford FP. *Writing Scientific Papers in English: an ELSE-Ciba Foundation Guide for Authors*. Amsterdam, Oxford, New York: Elsevier-Excerpta Medica, 1975. Avoid abbreviations in the title. The full term for which an abbreviation stands should precede its first use in the text unless it is a standard unit of measurement.

In most countries the International System of Units (SI) is standard or is becoming so. Report measurements in the units in which they were made. Journals may use these units, convert them to another system, or use both.

Submission of manuscripts

Mail the required number of manuscript copies in a heavy paper envelope, enclosing the manuscript copies and figures in cardboard, if necessary, to prevent bending of photographs during mail handling. Place photographs and transparencies in a separate heavy paper envelope.

Manuscripts should be accompanied by a covering letter from the author who will be responsible for correspondence regarding the manuscript. The covering letter should contain a statement that the manuscript has been seen and approved by all authors. The letter should give any additional information that may be helpful to the editor, such as the type of article the manuscript represents in the particular journal, information on publication of any part of the manuscript, and whether the author(s) will be willing to meet the cost of reproducing colour illustrations. Include copies of any permissions needed to reproduce published material or to use illustrations of identifiable subjects.

Archives of Neurology	Journal of the American Medical Association
Archives of Ophthalmology	Lancet
Archives of Otolaryngology	New England Journal of Medicine
Archives of Pathology and Laboratory Medicine	

Appendix 2

COMMONLY USED APPROVED ABBREVIATIONS

TABLE I—Standard units of measurements and statistical terms

Term	Abbreviation or symbol	Term	Abbreviation or symbol
<i>Standard units of measurement</i>			
ampere	A	joule	J
ångström	Å	kelvin	K
barn	b	kilogram	kg
candela	cd	liter, litre	l or L
coulomb	C	meter, metre	m
counts per minute	cpm	minute	min
counts per second	cps	molar	M
curie	Ci	mole	mol
degree Celsius	°C	newton	N
disintegration per minute	dpm	normal (concentration)	N
disintegration per second	dps	ohm	Ω
electron Volt	eV	osmol	osmol
equivalent	Eq	pascal	Pa
farad	F	revolutions per minute	rpm
gauss	G	second	s
gram	g	square centimeter	cm ²
henry	H	volt	V
hertz	Hz	watts	W
hour	h	week	wk
international unit	IU	year	yr
<i>Statistical terms</i>			
correlation coefficient	r	probability	p
degrees of freedom	df	standard deviation	SD
mean	\bar{x}	standard error of the mean	SEM
not significant	NS	“Student’s” t test	t test
number of observations	n	variance ratio	F

TABLE II—Combining factors

Name and factor	Symbol	Name and factor	Symbol	Name and factor	Symbol
tera- (10 ¹²)	T	deca- (10 ¹)	da	nano- (10 ⁻⁹)	n
giga- (10 ⁹)	G	deci- (10 ¹)	d	pico- (10 ⁻¹²)	p
mega- (10 ⁶)	M	centi (10 ⁻²)	c	femto- (10 ⁻¹⁵)	f
kilo- (10 ³)	k	milli- (10 ⁻³)	m	atto- (10 ⁻¹⁸)	a
hecto- (10 ²)	h	micro- (10 ⁻⁶)	μ		

TABLE III—Other common abbreviations

Term	Abbreviation or symbol
adenosinediphosphatase	ADPase
adenosine 5'-diphosphate (adenosine diphosphate)	ADP
adenosine 5'-monophosphate (adenosine monophosphate)	
adenylic acid	AMP
adenosine triphosphatase	ATPase
adenosine 5'-triphosphate (adenosine triphosphate)	ATP
adrenocorticotrophic hormone (adrenocorticotropin)	ACTH
bacillus Calmette-Guérin	BCG
basal metabolic rate	BMR
body temperature, pressure, and saturated	BTPS
central nervous system	CNS
coenzyme A	coA
deoxyribonucleic acid (deoxyribonucleate)	DNA
dihydroxyphenethylamine	dopamine
electrocardiogram	ECG
electroencephalogram	EEG
enteric cytopathogenic human orphan (virus)	ECHO
ethyl	Et
ethylenediaminetetraacetate	EDTA
gas-liquid chromatography	GLC
guanosine 5'-monophosphate (guanosine monophosphate, guanylic acid)	GMP
haemoglobin	Hb
logarithm (to base 10; common logarithm)	log
logarithm, natural	ln
methyl	Me
Michaelis constant	K _m
negative logarithm of hydrogen ion activity	pH
partial pressure of CO ₂	PCO ₂
partial pressure of O ₂	PO ₂
per	/
per cent	%
radiation (ionising, absorbed dose)	rad
respiratory quotient	RQ
specific gravity	sp gr
standard atmosphere	atm
standard temperature and pressure	STP
ultraviolet	uv
volume	vol
volume ratio (volume per volume)	vol/vol
weight	wt
weight per volume	wt/vol
weight ratio (weight per weight)	wt/wt
